

January is Radon Action Month

Radon is a colorless and odorless chemical present in all 67 Pennsylvania counties and is the second leading cause of lung cancer deaths in the U.S. The best time to test for Radon is in the winter months, when homes are closed and Radon levels are at their peak. Home testing kits may be purchased at most hardware and home improvement stores for about \$20 to \$30. For more information, go to www.dep.pa.gov and search "radon".
